

TANZIDA NOWSHIN

AI Engineer — Software Test & QA | AI-Assisted Engineering

Phone: 070-5279-6592 | Email: nowshinsara999@gmail.com

Portfolio: tanzidailylife.website | GitHub: github.com/Tanzida999

LinkedIn: linkedin.com/in/tanzida-nowshin

PROFESSIONAL SUMMARY

Web developer moving into AI-assisted test and QA engineering. Builds and ships real applications with Gen-AI tools — GitHub Copilot, Claude, ChatGPT, Gemini and Lovable — and reviews and tests AI-generated code before release. Uses GitHub Copilot in day-to-day project work. Hands-on with a live AI companion app where safety logic was validated through scripted test conversations and real-device testing. Works across the MERN stack, API integrations, workflow automation, Python and AWS, with experience delivering for clients in Japan and Bangladesh. Fast, self-directed learner.

GEN-AI & AI-ASSISTED ENGINEERING

AI coding tools: GitHub Copilot, Claude, ChatGPT, Gemini, Lovable (AI app builder)

AI engineering: Prompt and agent-instruction design, LLM API integration, AI output review and validation, AI safety classifier testing

Testing & QA: Test case design, manual and exploratory testing, regression checks, real-device testing, troubleshooting, defect diagnosis and bug fixing

WORK EXPERIENCE

Web Developer / Designer — Akino Group (Japan)

Feb 2026 – Present

- Design, develop and produce content for client and in-house websites
- Operate and maintain servers, including data management and performance optimization
- Use GitHub Copilot to build company projects

Web Developer — Ecommerized

Jul 2025 – Jan 2026

AI-powered e-commerce management platform | ecommerized.ai

- Built client projects using GitHub Copilot as an AI coding assistant
- Set up and configured chatbots on multiple websites, and connected business apps through API integrations
- Built and maintained automations across apps, including the sales team's sales and customer communication workflows
- Diagnosed and fixed technical issues for the sales and business development teams, and kept course automations running smoothly
- Built and managed the Shopify storefront for Abu Dhabi Store (UAE and GCC delivery, Tap and Tabby payments), and maintained WordPress sites including the Ecommerized website

Web Developer — Sara's Collection BD

2024 – 2025

- Designed and built the business website, logo, flyer and brand identity

Founder — Touch and Glow BD

2023 – 2024

- Founded and ran an online product business through Facebook and Instagram pages
- Handled product listings, marketing design, customer orders and day-to-day operations

COMPANY PROJECTS — AKINO GROUP

LINE Booking Agent — AI Booking System for Small Businesses

In progress

- Building an AI-powered booking system with a clean Japanese-style interface, where customers book through LINE
- Aimed at small shops, clinics and salons in Japan that still take bookings by phone or on paper

Kizuna — AI Companion on LINE for Elderly and Isolated People

In progress

- Designing an emotional-support AI companion delivered through LINE, the messaging app most Japanese users already rely on
- Created two companion personas, Yasuragi (workplace wellbeing) and Mimori (elder care), and chose one to build first as the MVP

CLIENT PROJECTS

StockFix — UK Local Trades Marketplace (UK client)

In progress

github.com/Tanzida999/stockfix | TanStack Start (React), TypeScript, Supabase, Tailwind CSS, shadcn/ui, Zod — built with Lovable

- Building a marketplace that connects UK homeowners with local tradespeople, with separate homeowner, trade and admin dashboards

- Built trade search, sign-up and login with password reset, and an API route that notifies trades about new leads
- Using AI tools to generate code, then reviewing and testing each change across 140+ commits

Barilagbe — Rental Management Platform (Bangladesh client)

Live demo

barilagbe99.netlify.app | Built with Lovable (AI app builder), deployed on Netlify, Bengali-language UI

- Building a rental management platform for Dhaka that connects tenants, property owners, local area agents and lawyers
- Built thana-based property search, owner registration, agent and legal-help pages, and listings for flats, offices, shops and garages
- Checked the live site against the client's meeting notes, listed the missing features (agent dashboard, agreement tracking, lawyer review queue) and turned them into build prompts and a phased roadmap

SELECTED PROJECTS

Your Quiet Corner — AI Companion App (Live)

yourquietcorner.co.uk | TanStack Start (React), Capacitor (Android), Supabase, OpenRouter LLM, Firebase Cloud Messaging

- Warm AI companion web and Android app for UK adults, built mainly with AI tools (Lovable, Claude, ChatGPT) with every AI-generated change reviewed before release
- Tested a three-tier safety classifier (none / distress / crisis) with scripted test conversations, then fixed false positives found in testing
- Diagnosed and fixed a Google login loop caused by a routing bug; verified push notifications end to end on a real Android device
- Shipped test builds (APK) to testers and fixed reported issues before Play Store submission

Sakinah — Islamic Companion App (Personal)

UI prototype live

sakinahmuslim.netlify.app | [GitHub](#) | HTML, CSS, JavaScript

- Built an interactive UI prototype with prayer times, AI chat, a Qibla finder using the phone's location and compass, a dhikr counter, and nearby mosques and halal food, in light and dark themes
- Designed chat answers to show Quran and hadith references and side-by-side scholarly views, with a clear note that answers are not religious rulings

Real-Time MLOps Sentiment Analysis Dashboard

In progress

Amazon Kinesis, Amazon Comprehend, Amazon OpenSearch, Amazon CloudWatch — built alongside AWS cloud coursework

- Building a real-time pipeline that ingests live data with Amazon Kinesis and runs sentiment analysis with Amazon Comprehend
- Aggregating results into Amazon OpenSearch for a live dashboard, with latency monitoring and anomaly alerts in CloudWatch

TECHNICAL SKILLS

Languages & Frameworks: JavaScript, TypeScript, Python, React.js, Node.js, Express.js, Redux, HTML, CSS

Databases: MongoDB, MySQL, Supabase (PostgreSQL)

Cloud & Infrastructure: AWS (EC2, S3, Kinesis, Comprehend, OpenSearch, CloudWatch), cPanel

CMS & E-Commerce: WordPress, Shopify, REST API integration

Tools: Git / GitHub, VS Code, UI/UX and responsive design, Canva

Spoken languages: Bangla (Native), English (Fluent), Japanese (JLPT N3 — studying)

EDUCATION

B.Sc. in Computer Science and Engineering — United International University

Sep 2019 – Jul 2024

GPA 2.87 / 4.00

HSC — Begum Badrunnesa Govt. College (GPA 3.67 / 5.00)

2017 – 2018

SSC — A.K. School and College (GPA 5.00 / 5.00)

2016

CERTIFICATIONS & TRAINING

- AWS Certified AI Practitioner (AIF-C01) — in progress
- AWS Certified Cloud Practitioner / Solutions Architect – Associate — in progress
- MERN Stack Development Certificates — Great Learning and Simplilearn (2024)
- Workshop on ICBDB 2023
